JOHN,

Congressional dysfunction is more than just fodder for cable news and late-night talk shows. It has serious consequences for our nation and for countries around the world.

The GOP-controlled House has brought us to the brink of a government shutdown, held up funding for our global allies in need, and caused our credit rating to be severely downgraded.

Like many Americans, I feel it's my duty to do everything in my power to end the dysfunction. Fortunately, I have a real opportunity to do just that.

Whoever wins the MI-10 congressional race could decide which party takes control of the House next year. If I'm able to beat John James and win this critical seat, it could change the face of our nation and have positive repercussions all over the world.

And the thing is, this is no pipe dream. In 2022, we came within 1,600 votes of defeating John James. One and a half years later, we're stronger, smarter, and more motivated than ever to ensure we flip M-10 and take back the House.

[Your donation of \\$25 or more today will help us accomplish this critical goal, restoring our nation's integrity and putting us back on the right track. Next month, we have to publicly report our fundraising numbers so please rush a donation before our fast approaching mid-quarter deadline.](#)
